aluminium shutters

Bi shutter **plus** range

Blind Inspiration have been sourcing the world's best shutters for the Australian market. We have an extensive range of poly , timber and aluminium suitable for our extreme weather conditions.

Plantation Shutters are a low maintenance, classy, alternative covering for windows and doors.

Plantation Shutters are a design statement by interior designers and people looking to add style and value to their homes.

An additional benefit is that shutters can be fitted to any shaped door or window including round, angled or arched windows.

When closed, Plantation Shutters offer warmth, privacy, and protection. Opened, they create a sense of spaciousness while still giving access to even the most breathtaking views, with an almost magical ability to direct ambient light into a room, highlighting the features you most want illustrated.

Plantation Shutters really are the elegant option to add to warmth, security and design to any home.
